- our new Sage Timeslips Go Assistant, Ally, offers information and guidance on Sage Timeslips Go.

  From within Sage Timeslips Go, click the Chatbot button at the top right corner of the screen

Timeslips Go April 2026 Update adds the following enhancements:

Enhancement #1: Name Visibility on Slips

Based on many requests, the Slip Entry screen now shows both nicknames for timekeepers, clients, references, tasks, and expenses.
(Ref: 356745)

Enhancement #2: Name Visibility on Filters

When using filters on screens or reports (for example when filtering clients the Slips screen or on a Slip Listing report), you can now view both nicknames to help you select the correct names.
(Ref: 361697)

Enhancement #3: Favorite Tasks and Expenses

Each timekeeper can now mark tasks and expenses as their favorites, just like they've been able to do with clients. This can help speed up selecting tasks and expenses on slips or setting up activity filters on reports.
(Ref: 241441)

Enhancement #4: Abbreviation Cues

We've added a new abbreviation type called cues. Instead of expanding an abbreviation, a triggered cue will show a message associated with a token. This is useful when you want to reinforce your firm's policies regarding terminology usage or additional steps the timekeeper should take when tracking certain types of charges.
(Ref: 367897)

Enhancement #5: Expanding Abbreviations

When using abbreviations to speed up description entry, you can expand the token by clicking the Expand Abbreviations button or by saving the slip. Abbreviations will now expand when pressing the spacebar or when entering punctuation or other symbols, like parentheses.
(Ref: 361694)

Enhancement #6: View/Select Abbreviations from List

When entering slip descriptions, you can now view the list of global and personal abbreviations available to you. Optionally select an abbreviation from the list to automatically apply it into your description.
(Ref: 367898)

Enhancement #7: Searching for Clients on Client List

When maintaining clients on the Client List, you can search for clients using the Search button at the top of the list. For firms with many clients, this can help get to a specific client faster.
(Ref: 246870)

Enhancement #8: Keeping Your Place on Client List

When maintaining clients on the Client List (for example, after creating a new reference for a client) Timeslips would bring you back to the top of the Client List. Timeslips now remembers where you were on the Client List.
(Ref: 361697)

Enhancement #9: New Slip Report with Extra Field

Some customers were requesting detailed help to add the Extra field on Slip Listing reports. For your convenience, we've added a new Slip Listing with Extra report that adds the Extra field to the slip details. Feel free to duplicate this report and make additional design changes to suit your firm.
(Ref: 361696)

Enhancement #10: New Fields Available for Slip Listings

We've added three new fields available to Slip Listing reports that can help timekeepers evaluate their time entries: Percent Billable (Billable Time / Time Spent), Percent Unbillable (Unbillable Time / Time Spent), and Average Rate (Billable Value / Billable Time Spent). If you use these fields in the Totals section and sort and subtotal your report by Day, Week, or Month, you can view trends of the time you're capturing.
(Ref: 368051)

Enhancement #11: Chatbot Assistant

Our chatbot assistant is now available to help customers with basic questions about Sage Timeslips Go. This chatbot is in a Beta release, and we're continually training it and improving responses. You can initiate a chat session by clicking the chatbot button in the top right corner of the screen. If you are unsure about any answers it provides, please do not hesitate to contact our Support group.
(Ref: 352010)

Enhancement #12: Troubleshooting Login Accounts

We've added a new troubleshooting tool to help evaluate problems with login accounts. Administrators can click their initials in the top right corner and choose Timekeeper Login Accounts to view if login accounts are set up properly for their timekeepers.
(Ref: 351498)

Enhancement #13: iOS and Android app for time entry

You can now use iOS and Android apps to connect to your Timeslips Go account so you can view and enter time. You can search for the applications in the associated app stores, or find the links to the applications on the Timeslips Go login page.
(Ref: 367083)

Timeslips Go April 2026 Update addresses the following issues:

Issue #1: When viewing totals on the Slip List, the Total Value was not rounding properly when expense slips were included. Individual Slips were correct and transferred to Timeslips Premium with the proper amounts; only the total on this page was not rounding.
(Ref: 367377)

Issue #2: When expanding an abbreviation received from Timeslips Premium (a global abbreviation) that included a prompt, if you canceled the prompt then other abbreviations also in your description may not expand properly.
(Ref: 368135)

Issue #3: When logging out of Timeslips Go, the resulting Login page could refer to "Timeslips Anywhere" instead of "Timeslips Go"; this caused confusion for users.
(Ref: 368049)
