EMDA Integration into Enterprise Management A step by step guide to integrating EMDA into (X3) Enterprise Management.

### CONTEXTUAL LINKS

To integrate contextual links within standard EM screens we must first add screen components, screen(s), and update the windows the links will reside in.

- Create screen components
- Create screens
- Update container windows

Throughout the creation of these resources we will utilize the EMDA activity code. This will make it easy to search and edit in the future as well as export for patch importation for migrations.

# SCREEN COMPONENTS

Navigate the site map to Development>Script Dictionary and select screen components

•	Select New	All > Development > Script dictionary > Screens Screen components (3 (1 ) (2)	🔯 SAGE	Close page New Save		
		and description Text' in selection popup	All > Development > Script dictionary		Text	
			Code * EMDA_ARAGE Q III Description EMDA AR Aging	URL Evalu	Cancel	-

### SCREEN COMPONENTS

- Select applicable grouping module
- Jump to Activity code to create a new one

Code *	Link type				
EMDA_ARAGE Q, 🖾	URL -				
Description	Evaluated title				
EMDA AR Aging					
XSL type	Parameter code				
	<u></u>				
Module	Activity code				
A/P-A/R accounting 👻	Q <b>1</b> 🖬				
Address	Location Jump to				
	World wide web				

Create ZEMDA activity code

Activity codes will act as a category that can be searched and grouped. Custom codes should start with a Z. This will make these modifications easily identifiable if the integration of EMDA needs to happen on more than 1 instance of EM. A patch can be created by exporting by activity code to be used to import into another deployment.

Activity of	odes		SAGE SAGE	New
0000				Save

				Documer
Dependency		Activity code	Formula	Paragraphs
None	*			Links
				Generation

# SCREEN COMPONENTS

• Get the URL from EMDA

-Open the folder with the resource -Click share

-Copy the 'Embedded' url

-To pass the customer number to the dashboard add Customers].[Customer].&["+[M]BPCNU M+"] " to the end of the url

- Paste the URL in the address with a =" at the beginning
- Set the Security to 'Low'
- Create

Screen compone	ents	SAGE SAGE	New
0000			Save
Code *	Link type		Create

Address	EMDA	Security level	Utilities Browsing
ge/View/Public/Finance/Accounts	World wide web 👻	Low 👻	Reports
57			ii b Uala

### **IDENTIFY COMPONENT LOCATION**

Identify the screen you would like to add the url to. In this example I'd like to add AR Aging to the customer screen on a tab similarly to Contacts

- Navigate to the Customers screen
- sage 🛛 📾 00 .\* Customer 0000 Ciclo Belas 2 ZAC Q 💁 🖽 ZA011 Q, 🗇 A0003 Farmácia Saude e Higiene A0004 Distribuição Angola Farma IDENTITY. SHIP-TO CUSTOMER BANK ID CONTACTS
- Click on any field and click ESC+F6
   This will provide the screen the field
   resides on. We need the main screen to
   identify where to group the screen. The
   window which we will edit in a future step
   typically has a similar naming convention
   but starting with a O(BPC).

### CREATE SCREEN

• From the top navigation within the Menu Items go to All>Development>Script Dictionary>Screen>Screens

By searching the BPC screens we can identify the different customer screens. We'll want to create a screen that fits into the same naming convention for consistency.

• Click new on the far right

# CREATE SCREEN

### • Populate screen as shown below

creen code *									Descri	otion						Tem	pl. screen	
BHC1	Q, EB	1	BPC/						EMDA	AR AGI	NG							
SENERAL FIEL	DS																	
haracteristics													Scri	ots				
ctivity code		1	Module										Stand	ard scrip	nt *			
ZEMDA	Q 🛅 🖽	_	Common Data					*	]				SUBB	BPC7			Q, 🖽	
ize													Vertic	al script				
Tab					25					74							Q, 🖽	
													Specif	fic script	*			
	ZEMDA												SPEE	PC7			Q, 💷	
Blocks																		
I Q.					_													
Block t	tle		Block type		P	Li	C	Н		S		Act		Line	Options		Parameter	Represent
1 [1]			Browser	*	1.1	1	1			5	15	ZEMDA	Q 🗉			Q 🖽	BPSHO	
2 🗐				*									QE			Q, 💷		
					*													
eference table																		

#### Note: Click ok on pop up

### EDIT WINDOW

- From the top navigation within Screens navigate the site map to Development>Script Dictionary>Window
- Search the description Customer and select the OBPC window
   Based on the prior field search step we know that the window is likely going to have a similar naming convention to BPC

# EDIT WINDOW

As we can see by the tabs it mimics the tabs on the Customer screen

Window mana		All > Development > Script dictionary													
Vindow	Description	Window management								🔯 SAGE					
ADREPC DBPCMVT DDPCREDIT	Free customer address entry Customer balances resync Customer hold/release	Window * OBPC Q, Ell	Description * Customer

BPC0	Q 🖸												Reports Help
Tabs	Custor	mers											▶ Help
. Q						0 F	loguite	Displ	ay: 15	- 2			í.
	Tabs	Screen title		Tab titles		S	Visible		Activity				
1 🖼	BPRBPC	Q, 💷 Identity		Identity	122	5	Yes	×		Q, 88			
2 🖽	BPABPC	Q, 🗐 Addresses		Addresses	EB	10	Yes	*		Q, EB			
3	RPC1	Q. Fill Commercial		Commercial	FB	15	VAS	٠	FTC	Q, Fill			
4 🐨	BPC2	Q, Ell Managemen	t	Management	Ell	20	Yes	٠		Q, EB			
s 🗐	RPC3	Q Fill Financial		Financial	FB	25	Ves	*		Q, FII			
6 🖽	BPC4	🔍 🖽 Ship-to cust	omer	Ship-to customer	Ell	30	Yes	÷	FTC	Q, 28			
7 🖽	BIDBPC	Q, 🗐 Bank ID(s)		Bank ID	8	35	Yes	v		Q, 🖽			
8 🖽	CNTBPC	Q, 💷 Contacts		Contacts	Ell	40	Yes	+		Q, 68			
9 🖼	BPC7	Q. 🗐 FMDA AR AG	BING	EMDA Adina	52	.45	Yes	٠	ZEMDA	0.63			

• Save – the window will auto validate

# VERIFY WINDOW CHANGE

Navigate back to the Customer and verify the EMDA Aging tab added is present and when clicking between customers the dashboard updates
