Sage Construction Management: Getting Started Customer Learning

We're thrilled to share the news about our brand-new, free **Getting Started training** and our **revamped** Sage University Getting Started learning page explicitly tailored for our Sage Construction Management customers!

The free learning focuses on key topics, including **basic navigation, contact management, projects,** and **prime contracts** setup, which will help you get up and running in no time.

We have also made the Getting Started training super easy to find by setting up a direct link to the Sage University page:

<https://sageu.com/SageCM/getstarted/>

Plus, you can enjoy watching all the Getting Started videos without logging into Sage University.

Go check it out, and please share with anyone who could benefit from this training.

Thank You
