

Sage 500 ERP

The investment that keeps on giving

We understand that every business faces unique challenges and must make strategic decisions. As your trusted partner, we want to thank you for your loyalty and let you know that we're here to help your business get tremendous value from Sage 500 and make your investment really count.

Minimizing disruption, maximizing operational efficiency

It may be tempting to make a change. But remember a switch means acquiring new software, training users, maintaining dual systems while transitioning, and adapting your operational processes. This can lead to hidden costs and temporary disruptions in your everyday operations.

Sage

The beauty of mature technology

A cost-saving, proven strategy

Think of Sage 500 as an older but highly reliable aircraft like the Boeing 767. Although newer aircraft may seem shiny and efficient, the total operational cost tells a different story. For instance, let's say leasing a new aircraft cost \$14 million annually, along with an annual maintenance fee of \$2.5 million.

Compare this to an older, owned aircraft with \$0 lease payments, \$9 million in maintenance, and \$3.1 million in fuel costs due to slightly less engine efficiency. At the end of the day, Sage 500, like the trusty Boeing 767, delivers consistent performance and saves you significant costs.

The hidden value—beyond maintenance and support (M&S)

With Sage 500, what you're investing in isn't just the software. It's also the customizability that aligns perfectly with your specific business needs. Each time we enhance our product, your team has the opportunity to further tailor Sage 500 through our partners, enabling you to take full advantage of new enhancements, security, and functionality.

Sage 500 isn't just a software solution—it's a strategic partner designed to grow and evolve with your business. We appreciate your trust in us and will continue to focus on delivering valuable, cost-effective, and efficient solutions for your business.

The future of Sage 500

Sage 500 is one of Sage's most established offerings and a market-leading ERP solution. Sage is committed to the continued growth and stability of Sage 500 through customer and partner-inspired product enhancements, updates to keep you tax and payroll compliant, and close alignment with our ISV partners, Avalara (Sales Tax) and Aatrix (1099 processing) to ensure your Sage 500 solution is always in compliance with integrated apps and functioning optimally.

Sage 500 ERP

Our team continues to provide comprehensive compliance updates—including critical Sage ISV compliance—as well as customer and partner-inspired enhancements—to help you streamline operations, manage with insight, and grow your business.

Our latest release, 2024.0 was made available in March 2024. It's designed to make the time you spend in Sage 500 even more friendly, efficient, and secure.

Get the most out of your investment by upgrading today to gain greater insight into day-to-day operations, make more informed decisions, and improve the profitability of your business.

Some of our most recent enhancements and features include:

- Ability to display audit trail
- Add Gross Profit amount and Markup percent on the Estimate Entry Totals tab
- Ability to enter a percent greater than 99.99% as the Trade Discount Percent in Sage 500 (currently Maintain Customers only allows two whole decimals to be entered)
- Ability to have the Control number and Item number sync in numerical order on the Reconciliation Report in Process Physical Inventory
- Option to set a warning if Purchase Product Line (PPL) is not entered in Replacement tab for Maintain Inventory
- Add validation or warning message when deleting a Sales Order line that has already been tagged in a Purchase Order
- Ability to enter AP Vendor Date Established
- Database Upgrade Utility Detail Report of Open Batches
- Extended DataPorter functionality to 1099 tab at Maintain Vendors
- Document Transmittal log to include all contacts who were sent email
- Latitude and Longitude functions are not supported for Sales Order generated from blanket Sales Order and Purchase Order generated from blanket Purchase Order

“We’ve doubled our business in the past eight months and yet lowered our labor costs, thanks to Sage 500 ERP.”

John Kalinich, COO
Teva Sport Sandals
