- Comprehensive compliance—elevated data protection and thorough audit trails.
- Enhanced user experience—navigate Sage 100 more intuitively.
- Improved efficiency—streamlined workflows and new automation features.
- Extended flexibility—tailor to fit your unique business requirements.

Sage

What's New in Sage 100 Released April 2024

Inventory Management

Delete Warehouse and Change Warehouse Utilities—Easily manage virtual storage spaces, eliminate obsolete warehouses, and modify existing ones to adapt to changing business needs.

Item Description Suppression—Improve workflow efficiency with an option to suppress extended item descriptions in grids, reducing distractions during data entry.

Production Management

Activity Code Maintenance—Improves user efficiency and navigation within the Production Management module by offering a more streamlined and focused lookup experience.

Cost Roll-up Register—Enables more accurate cost calculations in Production Management, providing users with greater flexibility and control over cost analysis and management.

Audit Tracking

Customer, Vendor, Item, and Employee Audit Trail—Track and print detailed audit trails for enhanced security compliance, providing comprehensive monitoring of changes to critical data.

Audit Reports

Print when Entity is in Use—Uninterrupted access to audit reports, improving workflow efficiency and allowing for seamless reporting even during active data maintenance.

Purchase Order

Quick Close of Partially Received Purchase Orders—Simplified closure of partially received purchase orders during receipt of goods entry, providing greater flexibility and clarity in order management.

Received Status for Orders Received but not Invoiced—Introduces a “Received” status for purchase orders, enhancing visibility and enabling better reporting of order status.

Accounts Payable

Vendor 1099 Form Fields—Simplifies vendor management and compliance by allowing tracking of W-9 forms and encrypted retention of taxpayer IDs or social security numbers.

Sales Order

Reset Sales Order and Picking Sheet Print Flags for Back Order—Automates print flag resets for backorders, saving time and improving workflow efficiency during sales journal updates.

Display Ordered Quantity in Red—Enhances visibility and alerts users when sales order quantities surpass inventory thresholds, facilitating better inventory management and preventing overordering.

Library Master

Restricted Mode for Administrator Tasks—Provides administrators with greater flexibility and control over user access, ensuring smoother management of system updates and modifications.

Email Notification for Task Scheduler—Improves task management and workflow reliability by ensuring all scheduled tasks are processed, with notifications to alert users of any issues.

Advanced Lookup Engine (ALE)

Retain Search Value—Enhances usability and efficiency by retaining search values, reducing user frustration, and streamlining data retrieval within ALE lookups.

Auto-Complete Search Index

Add, Change or Delete Entities Automatically—Improves search performance and eliminates manual tasks, enhancing user productivity and ensuring up-to-date search results for improved data accessibility.

The Sage 100 2024 release brings a host of new features and enhancements aimed at improving efficiency, enhancing user experience, ensuring compliance, and providing flexibility for businesses of all sizes.

Whether you're an existing customer or considering **Sage 100** for your organization, this release offers compelling reasons to upgrade or subscribe. Upgrade now to unlock the full potential of Sage 100 and stay ahead in today's dynamic business environment.
