

IMPORTANT NOTE - NEW - Elastic Search 6.4 version

The next release of Sage X3/ X3 HR: **V12.0.18** (2019.R3, planned July 1st, 2019) has been validated with **Elastic Search 6.4**.

We strongly recommend to use this version 6.4, although Sage X3 / X3 HR continue to work with older versions of Elastic Search. Installing Elastic Search 6.4 will allow you to get all potential security fixes. This will also be available in September for V11.

IMPORTANT:

The licensing of **Elastic Search 6.4** has changed: we will not deliver the Elastic Search setup in future deliveries on our official media for on-premise Customers. Partners and customers will have to download the setup files when deploying Sage X3 / X3 HR.

The [pre-requisites documentation](#) will be updated accordingly in July, when this release is out and will contain the download links.
