

## Sage Education Program

# Give your students a head start with Sage Software.

Our **free** program provides access to exclusive Sage educational software, enabling students to develop practical, **job-ready skills**.

## Introduction

The Sage Education Program equips educational institutions with industry-recognized business software to prepare students for careers in bookkeeping, accounting, business, entrepreneurship, and more.

## Eligibility

Open to all educational institutions ready to teach real-world Sage software—schools, colleges, universities, NGOs, private training centers, employment agencies, and more.

# How the program works

## Free software for your institution and educators

Sage provides educational institutions with free educational software and registration keys for installation in computer labs. Each year, you'll receive access to the latest version release with updated registration keys—at no cost.

## Free software for students

Students receive their own free student version to install and practice on their personal devices.

## Free educator training

Educators gain access to free eLearning to build confidence in teaching Sage software via [Sage University](#).

## Teaching materials and resources

Sage supports effective instruction with official training materials available directly from our approved publishing partners or us.

## Give students a career boost

After completing your course, encourage students to take an official Sage certification exam. Certification is a powerful way for students to showcase their skills and stand out to employers.

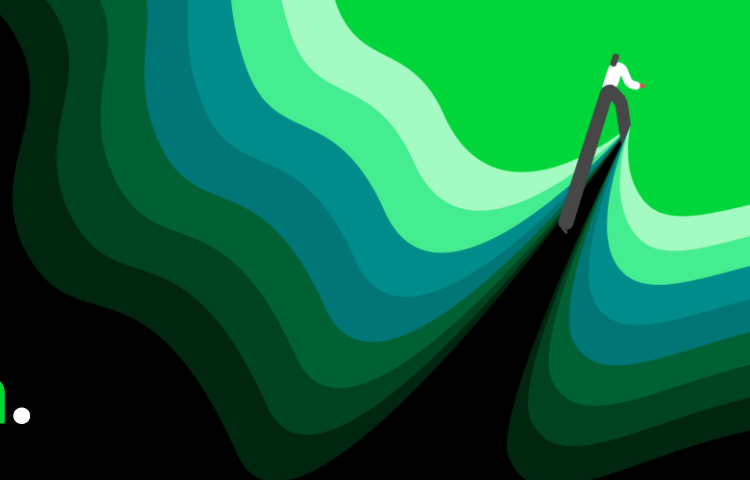

## Online self-guided support

While technical support isn't included, educators and students have access to extensive online resources, including:

- [Sage Education Program Resource Centre](#)
- [Support Resource Centre & Sage Knowledgebase](#)

# Choosing the right Sage software for your classroom.

Discover which Sage software is available through the Education Program and choose the software that best fits your course and students.

Software	Notes
<b>Sage Accounting</b> (Canadian Edition)	<ul style="list-style-type: none"> <li>Version type: <b>Cloud</b></li> <li>Replica of <a href="#">Sage Accounting Plus</a></li> <li>No Payroll Module</li> <li>Doesn't allow multi-company</li> <li>Educator version doesn't expire</li> <li>Student Version; available for <b>30 days</b></li> </ul> <ul style="list-style-type: none"> <li>Cloud version is updated regularly</li> <li>No training guides or data files available</li> <li>Free eLearning courses</li> <li>Solution; French and English</li> </ul>
